

# MITEL MiCOLLAB

Everything employees need to connect, communicate, and collaborate with others from anywhere, at anytime.

## Key Benefits

- A single application for voice, messaging, presence, conferencing, mobility, and team collaboration.
- Keep up with projects and share knowledge and ideas across business silos with integrated team collaboration services.
- A communications experience that's consistent across desktop and mobile devices.
- Increase speed of interactions and customer satisfaction with a connected workforce.
- Integrates with MiTeam Meetings for seamless video collaboration.

## Get work done, regardless of location

Work is not always done at a desk. Now, it can be done in the car, or while walking to lunch, or even while waiting for the plane to board.

It can include colleagues working from home, from different countries, or with those who are not part of the organization.

## Everything you need in one place

Mitel® MiCollab is a unified collaboration suite that aligns with how employees prefer to connect with others in today's fast-paced, often mobile workplace so that they can make every interaction efficient and productive whether it is with colleagues, customers, or partners.

MiCollab makes team collaboration simple with integrated voice, video, messaging, presence, and conferencing capabilities to streamline the way employees talk, meet and share information.

### Break down silos

Whether it's from their desktop or mobile device, with MiCollab employees can easily share ideas and tap into the knowledge of others across the organization, no matter where they are located.

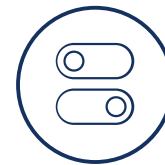

### Video-Based Collaboration

Quickly turn messages into face to face interactions with MiTeam Meetings integration.

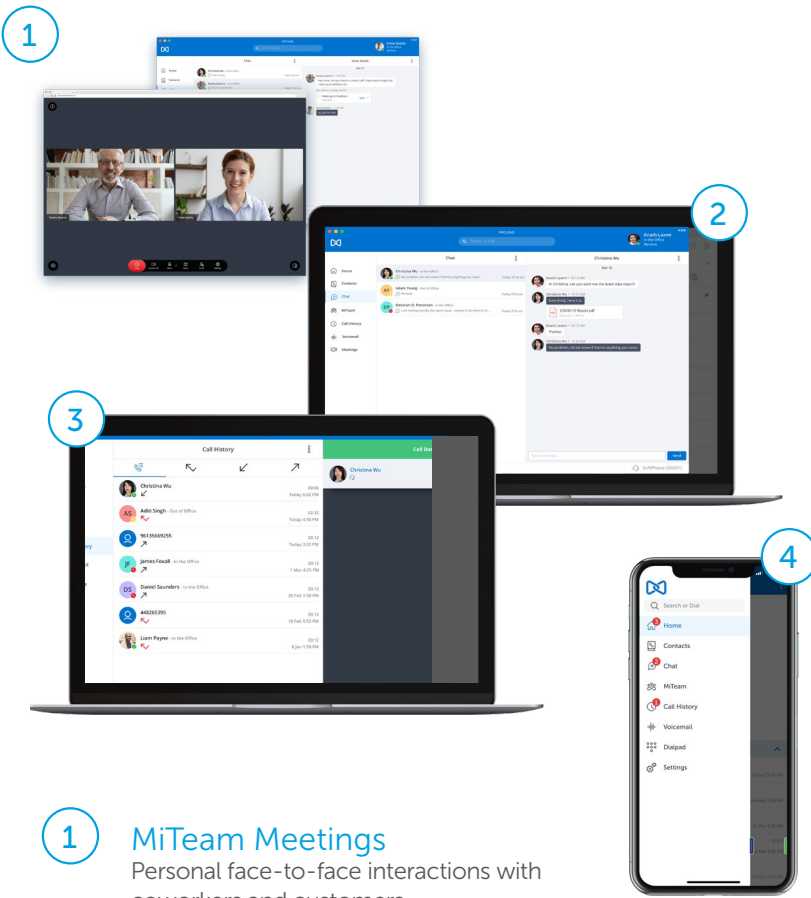

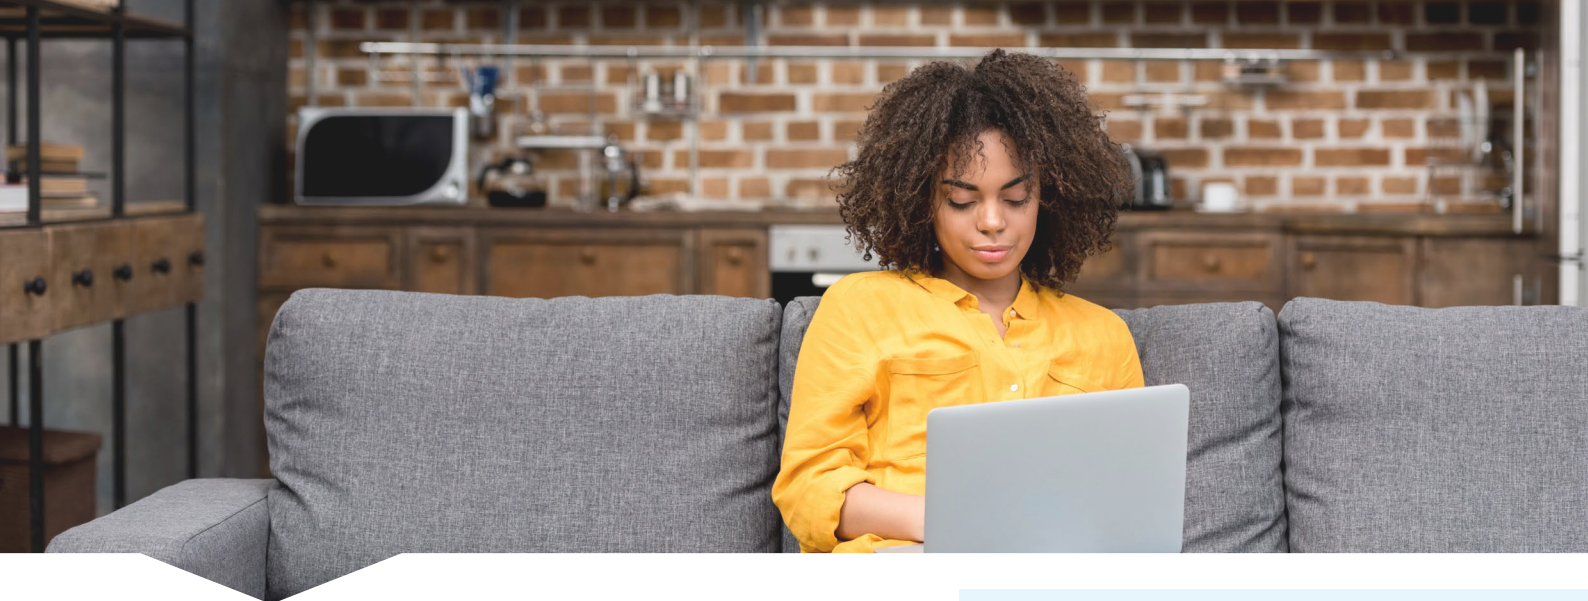

### Supercharge Productivity

With integrated collaboration tools, project activities, document reviews, task tracking, and real-time meeting participation has never been easier.

### Enhanced Call Control

Take communication to the next level with a collaboration solution that fits effortlessly into Mitel call control platforms.

## Key Features

- **Mobility** – extend office-based communications and team collaboration capabilities to iOS® and Android® devices.
- **Softphone** – enjoy the same desktop phone communications experience from a PC, laptop, or smartphone.
- **Public and Private Chat** – instant message with others using Mitel’s web-based chat services to share files and information.
- **Video Collaboration** – start a video call to colleagues and customers at the tap of a button with MiTeam Meetings integration.
- **Presence indicators** – always know if your colleagues are available, busy, or out of the office.
- **Web Client** – access unified communications and collaboration features including sharing applications, screens, and files using only a web browser.
- **Integration** – Streamline activities with integration to corporate calendars and other business applications.
- **Visual Voicemail** – quick access to voice messages with visual message handling.
- **Multilingual support** – offering a better experience for global teams.

- 1 **MiTeam Meetings**  
Personal face-to-face interactions with coworkers and customers.
- 2 **MiCollab Chat**  
Instantly share messages and files with teammates.
- 3 **MiCollab Softphone**  
All the benefits of a business phone directly from your PC or laptop.
- 4 **MiCollab Mobile Application**  
Stay connected while on the go.
